

PET DENTAL HEALTH

Many clients chose to take advantage of the dental health special promotion during the months of February and March. Here are comments from just a few of the clients who participated and whose pets left our hospitals with bright smiles!

Reasons that clients chose to have their pet's teeth cleaned:

- "To maintain Tucker's overall health."
- "My pet's veterinarian recommended that we have her teeth cleaned."
- "My dog had really bad teeth even before I got him. I wanted my dog to have a great life."
- "She smelled like a swamp."
- "My pet is a mature dog. We didn't want any problems to start since dental health is so important to overall health."
- "I realized my pet's mouth was sensitive about eating and chewing. He wasn't chewing on his toys as he usually does, and during his exam he cried because his mouth hurt so badly."

Sample of Client Comments Post Dental:

"...Tucker the pug, is so worth the expense and the time. Thank you for giving him good medical care and recommending dental cleaning. His smile is looking good!" -Tucker's Mom

" ... I know I made the right decision to have their teeth cleaned. Dental care is just as important in our pets as it is in us. My pets are healthier as a result of it." -Daisy's and Lola's Mom

" ...if you love your animal, you will make sure to brush and get routine dental care. My dog had really bad breath; if owners notice any of the signs or symptoms of dental problems, act on it as soon as possible." -Jada's Mom

"Theo needed a tooth extracted and that was the cause of his horrible breath. We would not have known that his tooth was so decayed and must have hurt him if he had not had his teeth cleaned." -Theo's Mom

"Don't wait for pain and swelling to get your pet's teeth cleaned. The cost of a cleaning is less money than the cost of trying to fix dental problems later..." -Sonny Boy's Mom

If you have questions about your own pet's teeth, breath, eating or play habit changes----speak with your veterinarian today
